1- SYMBOLS

Graphic symbols used on this manual:

THIS SYMBOL INDICATES A HOT SURFACE

THIS SYMBOL INDICATES ELECTRIC SHOCK RISK

THIS SYMBOL INDICATES GENERAL RISK

t_a 40°C

THIS SYMBOL INDICATES THE MAXIMUM OPERATING AMBIENT TEMPERATURE

THIS SYMBOL MEANS “SUITABLE FOR MOUNTING ON NORMALLY FLAMMABLE SURFACES”

THIS SYMBOL INDICATES THE MINIMUM DISTANCE FROM THE ILLUMINATED OBJECTS

THIS SYMBOL MEANS “DO NOT STARE AT THE OPERATING LIGHT SOURCE”

Risk Group 2

THIS SYMBOL INDICATES PHOTOBIOLOGICAL SAFETY

THIS SYMBOL INDICATES THE EUROPEAN COMMUNITY DIRECTIVE 2012/19/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE)

2- GENERAL WARNING

Read the instruction contained in this user manual carefully, as they give important information regarding safety during installation, use and maintenance.

The unit is not for household use and must be installed by a qualified electrician or experienced person.

Always disconnect the device from the mains before maintenance.

The device must always be equipped with an efficient ground connection.

3- GENERAL WARRANTY CONDITIONS

The unit is guaranteed for 36 months from the date of purchase against manufacturing material defects.

4- TECHNICAL FEATURES

OVERVIEW

The new MINI BRICK is a powerful, self-contained, IP65 LED Wash light in an ultra-compact case.

MINI BRICK is suitable for various purposes, offering a range of projection angles quickly interchangeable (no tools required).

MINI BRICK comes with an IP65 power cable plus 2 DMX cables with M / F XLR connectors (all IP65), that make it perfect for temporary lighting applications, but also for safe long-lasting installations.

Built with top quality components, MINI BRICK gives you the best value for money by efficient design and full production automation.

DTS product codes:

03.LDB120S11FC08 MINI BRICK FC ULTRA-NARROW lenses Black finishing

Available on demand:

03.LDB120S11FC10 MINI BRICK FC NARROW lenses Black finishing

03.LDB120S11FC25 MINI BRICK FC MEDIUM Flood lenses Black finishing

03.LDB120S11FC40 MINI BRICK FC WIDE Flood lenses Black finishing

LED Technology

12 x OSTAR STAGE "N" FULL RGBW LEDs

Optical group

8° projection angle

Range of quick-mounting holographic filters included: 20° / 40° / 60°x10° (no mounting tools required)

Uniform projection on surfaces

Color generation

16 million colors

Wide palette of pure uniform Whites with variable linear color temperature (2700K – 8000K)

4- TECHNICAL FEATURES

Control

DMX 512 / RDM

10 DMX channels (Default)

4-digit 7-segment LED display + 4 soft keys

Protection

IP 65

Power supply

Built-in full-range PSU 100-240Vac 50-60 Hz

Consumption: 200VA Max

Connections

Power supply: 3 x 1 sq mm cable (1,5 m length)

DMX In/Out: 0,7 m cable with XLR 5 pins IP65 connector

Operating ambient temperature

-10° / 40°

Weight

10 Kg

Certifications

2014/35/UE ; 2014/30/UE

IEC 62471 ; IEC 695-2-1

EN 60598-1 ; EN 62471 ; EN 61347-2-13

EN 60598-2-17 ; EN 55015 EMC ; EN 61347-1

DIMENSIONS

As standard

- 1 x Holographic filter 20° (code 0506A043.D11)
- 1 x Holographic filter 40° (code 0506A045.D11)
- 1 x Holographic filter 60°x10° (code 0506A092.D11)
- 1 x Display UV protection (code 03.LA.218)
- 1 x PowerCON TRUE1 female cable connector (code 0520P066)
- 1 x PowerCON TRUE1 male cable connector (code 0520P067)
- 1 x User's Manual

Optional (on request)

- Bracket for ground installation (code 03.LA.213)
- Barndoor black finishing (code 03.LA.211)
- Permanent installation kit IP68: Power IN IP68 cable connector + 2 x DMX IN/OUT IP68 cable connectors (code 03.LA.214)
- Aliscaf clamp for tube diameter 50 mm (Max load 100 Kg) (code 0521A008)
(indicated for any kind of loads vertical / horizontal)
- Professional Quick trigger clamp (Max load 100 Kg) (code 0521A037) (not indicated for horizontal load)
- "C" Clamp G60 (Max load 50 Kg) (code 0521A004) (not indicated for horizontal load)
- Safety cable 3 mm x 60 cm (Max load 60 Kg) (code 0521A010)

6- IMPORTANT SAFETY INFORMATION

6.1 Fire prevention:

- It is permissible to place the unit on normally flammable surfaces.
- Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.
- Minimum distance from the closest illuminable surface: 0,5 m. 
- Replace any blown or damaged fuses only with those of identical value (T 2.5A 250V).
- Refer to the wiring diagram if there is any doubt.
- Connect the unit to mains power via a thermal magnetic circuit breaker.

6.2 Prevention of electric shock:

- High voltage is present inside the unit. Unplug the unit prior to performing any function which involves touching the inside of the projector.
- The level of technology inherent in the MINI BRICK requires the assistance of specialised personnel for all servicing. Please refer to an authorised DTS service centre.
- A good earth connection is essential for proper functioning of the unit.
- Never connect the unit without proper earth connection.
- The fixture should be located in places with a good air ventilation.

6.3 Safety:

- Risk Group 2 product according to EN 62471.  Risk Group 2
- CAUTION. Do not look directly into the light output. May be harmful to the eyes and skin.

- Do not stare at the operating light source.

- The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.
- The unit is not for household use and must be installed by a qualified electrician or experienced person.
- The projector should always be installed with bolts, clamps and other tools that are capable of supporting the weight of the unit.
- Always use a second safety cable to sustain the weight of the unit in case of the failure of the main fixing point.
- The external surface of the unit, at various points, may exceed 60°C. Never handle the unit until at least 5 minutes have elapsed since the projector was turned off.
- Never install the fixture in an enclosed area lacking sufficient air flow.

The ambient temperature should not exceed 40°C. t_a 40°C

6.4 Level of protection against the penetration of solid and liquid objects:

- The projector is classified as an outdoor appliance and its protection level against the penetration of solid and liquid objects is IP65.
- Suitable for wet locations.

6.5 Waste Electrical and Electronic equipment (WEEE) directive:

-The machine, accessories and packaging should be sorted for environmental-friendly Recycling.

For EC countries: according to the European Directive 2012/19/EC for Waste Electrical and Electronic Equipment and its implementation into national right, luminaires that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

7- INSTALLATION

The unit is suitable for wet locations.

7.1 Floor mounting installation

MINI BRICK may be either floor or ceiling mounted.

For floor mounting installation, as standard, MINI BRICK can be used as a self standing projector.

Moreover, as additional accessory, a bracket with 4 rubber mounting feet (code 03.LA.213) is available on demand.

7.2 Ceiling mounting installation

For ceiling mounting installation, it is recommended the use of appropriate clamps to fix the unit to the mounting surface.

The supporting structure from which the unit is hung should be capable of bearing the weight of the unit, as should any clamps used to hung it.

For outdoor application where MINI BRICK needs to be installed vertically keep the unit display towards the floor.

ATTENTION:

A safety cable (code 0521A010) must be securely fixed to the unit's mounting bracket and to the support structure of the projector as shown in the picture.

Fixing clamps and safety cable are available on demand.

7.3 Display UV Protection

For outdoor installation, MINI BRICK is provided with a Display UV protection (code 03.LA.218).

To install the Display UV protection:

Put in place the UV protection plate and the gasket on the display panel and fix both with the 2 marked screws provided in the kit.

Fix the safety cable on the side cap with the marked screw and the washer provided in the kit as shown in the picture.

7.4 Permanent installation kit

A permanent installation kit for IP68 cable connections (code 03.LA.214) is available on demand.

Included in the kit:

- 1 x Power IN IP68 cable connector (code 0520P080)
- 2 x DMX IN IP68 cable connector (code 0520P082)
- 2 x DMX OUT IP68 cable connector (code 0520P081)

7.5 Protection against liquids

If IP65 protection is impaired for any reason, do not expose this product to external atmospheric agents, because it could be damaged.

7.6 Movement

The projector has a maximum movement of 110° for Tilt.

7.7- Risk of fire

Each fixture produces heat and must be installed in a well-ventilated place. It is permissible to place the unit on normally flammable materials surfaces. Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

Minimum distance from the object being illuminated is 0,5 m. $\varnothing 0,5 \text{ m}$

7.8- Forced ventilation

You will note, on inspection, that the unit features various air inlets and cooling fans. These should, under no circumstances, be blocked or obstructed whilst the projector is in operation. Doing so could cause the fixture to seriously overheat thereby compromising its proper operation.

7.9- Ambient temperature

The projector should never be installed in places that lack a constant air flow.

The ambient temperature should not exceed 40°C. t_a 40°C

8- INPUT / OUTPUT CONNECTIONS

8.1- Internal Fuse

Attention: the fuse replacement must be made by DTS personnel or experienced person.

Wrong operations can damage the IP65 protection.

To access the internal fuse loose the 6 marked screws which fix the lateral cover on display panel opposite side and remove the cover.

Use only replacement fuses rated T 2,5A 250V.

Paying attention to the gasket put in place the side cap and fix it with the 6 screws previously removed.

9- DMX SIGNAL CONNECTION:

The unit operates using a digital DMX 512 signal.

Connection between the controller and the unit or between units must be carried out using a two pair screened \varnothing 0.5 mm.

Ensure that the conductors do not touch each other.

Do not connect the cable ground to the DMX connector chassis.

The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one.

In this way, all the projectors are cascade connected.

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor Between pin 2 and 3.

The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XLR CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

9.1 DMX addresses

MINI BRICK can be controlled with 10 DMX channels (Default).
In order to use the unit in 10 DMX channels mode (Default), set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A011	If you want to select the next projector, just add "10"
Projector 3	A021	
.....	A.....	
projector 6	A051	

9.2 Selecting the DMX address

- 1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

10- RDM FUNCTIONS

By using a RDM controller it is possible to set DMX address, DMX mode and other parameters.

BRICK accepts the following RDM commands:

DEVICE_INFO	To read the following parameters: <ul style="list-style-type: none"> • RDM protocol version • Fixture model ID • Fixture type • Software version ID • DMX channels • DMX mode • DMX address • Total sub-fixtures • Total sensors
IDENTIFY_DEVICE	All LED channels ON at max power to identify the fixture
DMX_START_ADDRESS	To read / set the DMX address
SOFTWARE_VERSION_LABEL	Software version ID
SUPPORTED_PARAMETERS	List of all supported parameters
PARAMETER_DESCRIPTION	Description / details of Manufacturer Specific parameter as "NO DMX ACTION"
DMX_PERSONALITY	To set the DMX mode
DMX_PERSONALITY_DESCRIPTION	Description / details of the DMX mode
DEVICE_MODEL_DESCRIPTION	Description / details of the Fixture model
MANUFACTURER_LABEL	Producer ID
SENSOR_DEFINITION, SENSOR VALUE	Description / values of sensors

10- RDM FUNCTIONS

RDM MANUFACTURER-SPECIFIC PIDs	
NO DMX ACTION	<p>To set the desired fixture's behavior in case DMX signal is missing or not available.</p> <p>1 = Black-out</p> <p>2 = CHPR (demo program steps 01..16 same as menu "NDMX > CHPR")</p> <p>3 = All channels @ 100%</p> <p>4 = CUSTOM (RGBW values set into the menus "RED NO DMX" "GREEN NO DMX" "BLUE NO DMX" "WHITE NO DMX")</p> <p>5 = Keep last valid DMX signal</p>

11- FIRMWARE UPDATING

To update the software version of the MINI BRICK you need:

- DTS RED BOX interface (DTS Code 03.LA.008).
- USB-DMX Driver for the DTS RED BOX interface.
- "DTS Firmware Upgrade Utility v.2.02" program installed on PC.
- Latest firmware release available for MINI BRICK unit.

Updating the software version.

Please follow the procedure below to perform the update:

1. Install the DTS RED BOX USB-DMX driver on the PC you will use to update the unit software.
2. Connect the DTS RED BOX interface to a spare USB port on the PC (be sure that internal switch on DTS RED BOX is set to COM).
3. Connect the unit DMX input to the DTS RED BOX DMX output with a standard DMX cable and turn ON the unit.
4. Send the new software version into the unit by using "DTS Firmware upgrade Utility v.2.02" program. At the end of the procedure, the unit will reset.

12- DISPLAY FUNCTIONS

The MINI BRICK display panel shows all the available control menus. Using these options, it is possible to change the fixture's setting. Changing the DTS settings can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

MENU	<ul style="list-style-type: none"> • To access the control menus in the display panel. • To return to the previous level in the menu structure without making a change. • To exit the menus.
ENTER	<ul style="list-style-type: none"> • To select any required menu. • To confirm any changes.
UP / DOWN	<ul style="list-style-type: none"> • To navigate the menus structure. • To change any value.

Firmware release	1.00
-------------------------	-------------

MAIN MENU	LEVEL 1	LEVEL 2	LEVEL 3	FUNCTION
dISP	Pos1	AA		Display normal orientation for floor mounting position (Default)
		BB		Display inverted orientation for suspended mounting position
	Stby	OFF		Display always ON (Default)
		on		Display goes OFF after 10 seconds
Mode	10 cH			Allows to select 10 DMX channels mode (Default)
	6 cH			Allows to select 6 DMX channels mode
	rGBW			Allows to select RGBW mode (4 DMX channels)
	FinE			Allows to select FINE mode (10 DMX channels)
LEd	SntH	OFF-20		Allows to select the value of the delay (in milliseconds) for Dimmer channel reaction to DMX or Program variation. Off = Instant response to DMX variation. 4 = 100 ms Smooth response to DMX variation (Default) 20 = 500 ms Smooth response to DMX variation.
		comp	QuAd	Allows to select Quadratic current for linear light output (Default)
		LinE		Allows to select Linear current output
	Sync	610-5000		Allows to adjust the PWM frequency value (Hz) in order to reduce flickering in the process of your camera recordings. Default = 610 Hz
	bSt	on		Allows to increase the LED's current from 1050mA to 1500mA per channel Default = ON
		OFF		
	Auto	cHPr - STEP 01-16	SPEE	1-3600
WAIT			1-3600	
cPD1 cP16		rEd	0-255	16 customizable Colour Macros. RGBW values selectable by user (Default = 255) .
		GrEE	0-255	
		bLUe	0-255	
		WHIt	0-255	
rAln		SPEE	1-3600	Rainbow colours effect. Speed time value (in seconds) selectable by user (Default = 10) .
cUD1 cU16				16 Colour Macros as on DMX channel 9 (MACRO COLOR). Default = 01
2700 8000				12 White color temperature from 2700K to 8000K as on DMX channel 8 (CCT). Default = 2700K
dInn				Dimmer level selectable by user as on DMX channel 6 (DIMMER) Default = 255
SHut				Shutter level selectable by user as on DMX channel 5 (SHUTTER) Default = 15
ESc				Esc from automatic mode.

MAIN MENU	LEVEL 1	LEVEL 2	LEVEL 3	FUNCTION
rEc	10cH	r001		In DMX Recorder mode it is possible to create and store the scenes of the CHPR menu by using an external DMX controller. The unit must be set to 10 DMX channels mode. Refer to "REC MODE" at page 20.
		n001		
		n016		
SLAV	SurE	SLU		Slave mode. The unit is forced to DMX address 1 and 10 DMX channels mode receiving signal from the unit set in Auto mode.
		ESc		Esc from slave mode
FAn	Std			Allows to select the internal fans speed. Standard mode: High fans speed. Silent mode: Low fans speed for a very low noise operation. Default = STD
	SIL			
ndNH	LdNH			No DMX action. Keep last valid DMX signal (Default)
	oFF			Black-out
	CHPr	SPEE	1-3600	Chase with 16 steps previously created in REC mode as per AUTO > CHPR menu. Speed time and wait time values (in seconds) selectable by user (Default = 10) . In Auto mode the unit do generate DMX for slave units.
		WAIte	1-3600	
	100			All channels @ 100%

	unit			
SoFt	v.1.00			Software version

13- REC MODE

DMX Recorder mode

For the programming of ChPr by using a DMX controller, besides the 10 channels necessary to control the unit a further 3 DMX channels are needed.

So that in RECORDER mode (via DMX) the unit will need 13 channels to be correctly programmed.

The three new DMX channels are:

DMX channel 11 = SCENES channel

From 0-10 = no function (r001)

From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016)

DMX channel 12 = EDIT channel:

-From 0-19 = no function

-From 20-234 the unit runs the configuration given by the received input DMX values.

With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.

-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.

With the channel REC it is possible to record the selected scene as last scene.

DMX channel 13 = RECORDING channel

Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded). It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene (Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed.

14- ERROR MESSAGES

ERROR SHOWED ON DISPLAY	APPEARS WHEN
<i>LEd SEnSor Error</i>	LED thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>LEd ouErTEmPERAturE</i>	LED temperature detected over 100°C. Unit immediately goes in black-out.
<i>Micro SEnSor Error</i>	Micro controller thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>Micro ouErTEmPERAturE</i>	Micro controller temperature detected over 100°C. Unit immediately goes in black-out.
<i>drU1 SEnSor Error</i>	Thermal sensor on outputs 1 and 2 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU1 ouErTEmPERAturE</i>	Temperature detected over 100°C on outputs 1 and 2 of LED Driver board. Unit immediately goes in black-out.
<i>drU2 SEnSor Error</i>	Thermal sensor on outputs 3 and 4 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU2 ouErTEmPERAturE</i>	Temperature detected over 100°C on outputs 3 and 4 of LED Driver board. Unit immediately goes in black-out.

15- PERIODIC CLEANING

Lenses Front Glass:

The dust can reduce the luminous output substantially. Regularly clean the lenses front glass using a soft cotton cloth, dampened with a specialist glasses cleaning solution.

16- PERIODIC CONTROLS

Mechanical parts:

Periodically check all mechanical parts and the gaskets. Please refer to an authorised DTS service centre for any operation involving of the unit if needed.

Electrical components:

Check for unit proper earthing. Please refer to an authorised DTS service centre for any operation involving of the unit if needed.

Fuse replacement:

Locate the internal fuse, which protects the electronics, in the MINI BRICK. Using a multimeter, test the condition of the fuse, replacing it with one of equivalent type (T 2,5A 250V).

Attention: Disconnect mains power prior to remove the fuse to be tested.

17- HOLOGRAPHIC FILTER INSTALLATION

MINI BRICK offers a range of holographic filters quickly interchangeable (no tools required).

To properly install the holographic filter:

1 - Put in place the bottom edge of the filter.

2 - Bend the filter.

3 - Insert the top edge of the filter.

For permanent outdoor installation, the holographic filter can also be mounted internally.

To remove the filter simply lift with a finger the filter on the side with the opening as shown in the picture.

18- LENSES SET REPLACEMENT

Attention: the lenses set replacement must be made by DTS personnel or experienced person.

Wrong operations can damage the IP65 protection.

1 – Remove the front screen with the protection glass by loosening the 6 marked screws.

2 – Remove the original lenses set by loosening the 4 marked screws.

19- BARNDOOR INSTALLATION

The Barndoor for MINI BRICK (code 03.LA.211) is available on demand.

Fix the barndoor on the MINI BRICK by using the 4 marked screws previously removed from the unit body.

Once installed, fix the safety cable on the side cap by using the marked screw and the washer provided in the box as shown in the picture.

20- DMX PROTOCOL**10 CHANNELS MODE (Default)**
